

MAINTENANCE / USE

	TO BE USED	TO AVOID
Lacquered surfaces	soft cotton or microfibre cloths damp with water or natural products without solvents. Dry with a soft cloth. For persistent stains use neutral detergents diluted with water	rough and abrasive sponges, metal wool; abrasive products or with chlorine or greedy solvents, anti-limescale products and acetone
Nobilitato surfaces	soft cotton or microfibre cloths damp with water or natural products without solvents. Dry with a soft cloth. For persistent stains use neutral detergents diluted with water	rough and abrasive sponges, metal wool; abrasive products or with chlorine or greedy solvents, anti-limescale products and acetone; products with thinners can deform the edges
HPL surfaces	soft cotton or microfibre cloths damp with water or natural products without solvents. Dry with a soft cloth. For persistent stains use neutral detergents diluted with water	rough and abrasive sponges, metal wool; abrasive products or with chlorine or greedy solvents, anti-limescale products and acetone
AROCK® surfaces	soft cotton or microfibre cloths damp with water or natural products without solvents. Dry with a soft cloth. For persistent stains use neutral detergents diluted with water	rough and abrasive sponges, metal wool; abrasive products or with chlorine or greedy solvents, anti-limescale products and acetone
EXTRA-CLEAR GLASS surfaces	soft cotton or microfibre cloths damp with water or natural products without solvents. Dry with a soft cloth	rough and abrasive sponges, metal wool; abrasive products or with chlorine or greedy solvents, anti-limescale products and acetone; Avoid falling heavy objects and do not place hot objects on it
SILESTONE surfaces	soft cotton or microfibre cloths damp with water or natural products without solvents. Dry with a soft cloth. For persistent stains use neutral detergents diluted with water	rough and abrasive sponges, metal wool; abrasive products or with chlorine or greedy solvents, anti-limescale products and acetone; Avoid falling heavy objects and do not place hot objects on it
NATURAL STONE surfaces	soft cotton or microfibre cloths damp with water or natural products without solvents. Dry with a soft cloth. For persistent stains use neutral detergents diluted with water	rough and abrasive sponges, metal wool; abrasive products or with chlorine or greedy solvents, anti-limescale products and acetone; Avoid falling heavy objects and do not place hot objects on it
GRES surfaces	soft cotton or microfibre cloths damp with water or natural products without solvents. Dry with a soft cloth	rough and abrasive sponges, metal wool; abrasive products or with chlorine or greedy solvents, anti-limescale products and acetone
CASTMARBLE surfaces	soft cotton or microfibre cloths damp with water or natural products without solvents. Dry with a soft cloth	rough and abrasive sponges, metal wool; abrasive products or with chlorine or greedy solvents, anti-limescale products and acetone
TECNORIL surfaces	soft cotton or microfibre cloths damp with water or specific products without solvents. Dry with a soft cloth	rough and abrasive sponges, metal wool; abrasive products or with chlorine or greedy solvents, anti-limescale products and acetone
Mirror surfaces	soft cotton or microfibre cloths damp with water or specific products without solvents. Dry with a soft cloth	rough and abrasive sponges, metal wool; abrasive products or with chlorine or greedy solvents, anti-limescale products and acetone
Metal parts	soft cotton or microfibre cloths damp with water or specific products without solvents. Dry with a soft cloth	rough and abrasive sponges, metal wool; abrasive products or with chlorine or greedy solvents, anti-limescale products and acetone
